# CASE STUDY: THE COMPLETE PACKAGING SOLUTION

True Grace turned to Spectra for beautifully decorated packs for their range of True Being personal care products.

The stylish 300ml and 50ml packs, moulded in a tactile soft touch HDPE, feature our popular Tubular designs from our extensive standard product ranges.

The sophisticated packs highlight a combination of our innovative decoration skills.

True Grace was seeking a stylish solution for their new products, and this project allowed us to show how a number of our decoration services, when combined, can produce stunning results.

For example, True Grace took full advantage of our innovative 360-degree seamless print capability (see page 25), achieving a stylish repeat pattern that wraps around the circumference of the bottle. The design was printed with a gloss finish to ensure a beautiful contrast on the soft-touch matt surface.

The packs were then cleverly finished with luxurious gold foil blocking (see page 25) which appears to overlap the other printed elements on the bottle.

In the past, this has proved to be a technically challenging procedure that requires pinpoint registration accuracy; however, our highly skilled decoration department has developed an innovative way in which this can be successfully achieved.

True Grace was looking for a premium feel befitting of their products. By combining these different print technologies, Spectra perfectly illustrated how a luxurious looking outcome could be achieved with decoration alone.

Our customer commented, "Spectra pulled out all the stops to ensure our packaging exuded a premium feel. Their dogged determination to overcome conventionally difficult procedures proves that they are a genuine innovative packaging supplier"
